

Kwon Sunryong - Resume

Basic Information

Name: Kwon Sunryong (권순룡)
Current Position: Senior Researcher, Hansol Coever R&D Center (Sep 2020 ~ Present)
Total Experience: 5 Years (2020~2025)
Core Competencies: AI Initiatives & Automation, IT Operations & Digital Systems Management, Global Project Collaboration, SI Project PM, BI Dashboard Development

Career Timeline (2020-2025)

Motivation for Application

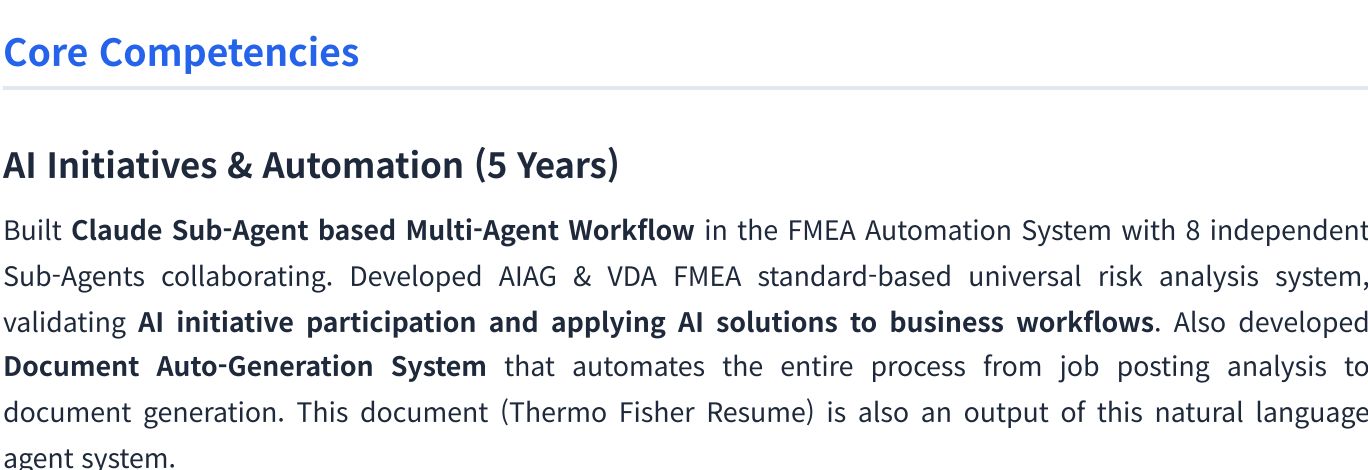

With 5 years of experience in IT operations, digital systems management, and AI model development, I have built expertise in Digital Transformation and AI initiatives through the process of converting "data to information, information to knowledge."

In the **O-WELL (Japan) Global Project**, I directly communicated with overseas clients, conducted technical discussions, requirements analysis, and prepared completion reports and deliverables. This experience enables me to immediately contribute to **Thermo Fisher Scientific's global team collaboration** requirements.

As **Total PM for the AMS Project**, I achieved GS Certification Grade 1, and in the **FMEA Automation System**, I built Multi-Agent Workflows to validate **AI initiatives and RPA/automation** capabilities. In **PM Agent**, I directly implemented **ITSM logic** similar to ServiceNow (Risk Management, Schedule Tracking, Integrity Check) to ensure operational stability.

I want to contribute to **AI-based service improvement, global technical team coordination**, and **operational dashboard development** for Thermo Fisher Scientific's E-commerce Operations, Sales App, and Contact Center platforms.

Core Competencies Map

Core Competencies

AI Initiatives & Automation (5 Years)

Built **Claude Sub-Agent based Multi-Agent Workflow** in the FMEA Automation System with 8 independent Sub-Agents collaborating. Developed AIAG & VDA FMEA standard-based universal risk analysis system, validating **AI initiative participation and applying AI solutions to business workflows**. Also developed **Document Auto-Generation System** that automates the entire process from job posting analysis to document generation. This document (Thermo Fisher Resume) is also an output of this natural language agent system.

IT Operations & SI Project PM (5 Years)

Served as **Total PM for government-funded SI projects** including AMS and CoCTK, managing the entire project lifecycle (planning-development-verification-delivery). Achieved **GS Certification Grade 1 x2** (CoCTK 2024, AMS 2025), and **official delivery to Seah Special Steel and Pomia**, proving customer-centric problem-solving capabilities. Contributed to project success by writing various planning deliverables including Business Plans, Execution Plans, Project Charters, BRD, FRD, WBS, PMP.

Global Collaboration & Communication

In the **O-WELL (Japan) Global Project**, directly communicated with overseas clients to develop the Causal Relationship Diagram AI Engine. Demonstrated **effective communication with international stakeholders** through completion reports and deliverables, contributing to company-wide DX acceleration.

BI Dashboard & Data Analysis

Built **Grafana-based real-time dashboards** in the AMS project, operating anomaly detection visualization systems. Developed Bayesian Network-based anomaly detection model achieving **93.7% accuracy**, with experience generating insights for business and operational decision support through data analysis.

ITSM Logic Implementation (ServiceNow-like Experience)

Implemented **self-developed ITSM logic** in PM Agent to manage the entire business management lifecycle:

- Risk Management:** Automatic extraction of toxic clauses from contracts/SOWs and risk assessment
- Schedule Tracking:** Automatic timeline updates through meeting minutes analysis
- Integrity Check:** Integrity verification to prevent missing documents or data fragmentation

Project Relationship Diagram

Career Overview

Hansol Coever R&D Center (Sep 2020 ~ Present)

Position: Senior Researcher (Manager Level)
Main Responsibilities:

- Total PM for AI Integrated Platform Development
- IT Operations and Digital Systems Management
- Global Project Collaboration and Communication
- Multi-Agent based Automation System Development

Achievements:

- GS Certification Grade 1 x2 (CoCTK, AMS)
- Official Delivery to 3 Sites (Seah Special Steel, Pomia, Japan O-WELL)
- Anomaly Detection 93.7% Accuracy
- Total PM managing entire project lifecycle

Key Project Experience

1. AMS (Analysis Management System) - Total PM

Period: Jul 2024 ~ Mar 2025
Client: Korea Institute for Advancement of Technology (KIAT)
Role: Total PM for AI Integrated Platform Development

- Key Achievements:**
- Bayesian Network-based Anomaly Detection Model:** Probability network construction through probability optimization (gradient descent), 93.7% anomaly detection rate
 - Grafana-based Real-time Dashboard:** Anomaly detection visualization, operational decision support
 - Project Success:** GS Certification Grade 1 (PDS name), official delivery to Seah Special Steel, Pomia
 - Planning Deliverables:** Business Plan, Execution Plan, Project Charter, BRD, FRD, WBS, PMP

Tech Stack: Python, SQL, Neo4j, Bayesian Network, Grafana

2. FMEA Automation System (Claude Sub-Agent) - Master Orchestrator Design

Period: Jun 2025 ~
Role: Master Orchestrator Design and Multi-Agent Architecture Development

Key Achievements:

- Multi-Agent Workflow:** 8 independent Sub-Agent collaboration (R&D, Mfg, QA), Claude Code Task tool based Master Orchestrator design
- NL-based Automation System:** AIAG & VDA FMEA standard-based universal risk analysis, Phase 0~5 automation workflow
- RPA/Automation Validation:** Document generation automation, significant work time reduction

Tech Stack: Python, Claude Agent, Multi-Agent Architecture, MCP (Model Context Protocol)

3. PM Agent (Business Management Sub-Agent) - ITSM Logic Implementation

Period: Oct 2025 ~
Role: System Design and Development Lead

Key Achievements:

- Self-developed ITSM Logic:** ServiceNow-like functionality
- Risk Management:** Automatic toxic clause extraction and risk assessment
- Schedule Tracking:** Automatic timeline updates through meeting minutes analysis
- Integrity Check:** Integrity verification to prevent missing documents

Tech Stack: MCP (Model Context Protocol), Docker, Claude Agent, HWP Parser

4. O-WELL (Japan) Automotive Painting Process - Global Project

Period: Dec 2023 ~ Mar 2025
Client: O-WELL (Japan)
Role: AI Engine Development and Overseas Client Communication

Key Achievements:

- Global Collaboration:** Direct communication with Japanese client, technical discussions, requirements analysis
- Causal Relationship Diagram AI Engine:** Relationship structure generation combining pattern optimization (information theory) and hierarchical clustering
- Company-wide DX Acceleration:** Completion reports and deliverables

Tech Stack: Python, AI Engine, Data Analysis

5. DPS (Data Collection System) - PM

Period: 2021 ~ 2024
Role: Core Architecture Design and Development (PM)

Key Achievements:

- 5-Layer Architecture Design:** Microservices architecture, Neo4j Graph DB
- Large-scale Data Processing:** Metal industry 5 major process AI automation, real-time data collection
- Docker/Kubernetes Infrastructure:** Container orchestration experience

Tech Stack: Python, SQL, Neo4j, Microservices, Docker, Kubernetes

6. Document Auto-Generation System (NL Agent)

Period: 2024 ~ Present
Role: System Design and Development Lead

Key Achievements:

- NL Agent-based Automation:** Claude Sub-Agent based Multi-Agent Workflow automating entire process from job posting analysis to document generation
- Customized Document Generation:** Automatic resume and portfolio generation matching job posting requirements
- Actual Application:** This document (Thermo Fisher Resume) generated by this system

Tech Stack: Claude Sub-Agent, Multi-Agent Workflow, Python, MCP, Prompt Engineering

Tech Stack

Programming Languages

- Python:** 5 years (49 Python modules: MLS, CoCTK, FBS, RMS, AMS)
- SQL:** MSSQL, PostgreSQL, Neo4j Cypher

AI & Automation

- Multi-Agent Systems:** Claude Sub-Agent, LangGraph, MCP
- ML/DL:** Bayesian Network, Gradient Descent, Predictive Modeling, Anomaly Detection

BI Dashboard & Visualization

- Grafana:** Real-time dashboard development
- Data Visualization:** Anomaly detection visualization, operational monitoring

Infrastructure

- Docker, Kubernetes:** Microservices architecture, container orchestration
- Neo4j:** Graph DB, 4M2E relationship definition, knowledge graph platform

ITSM & Project Management

- ITSM Logic:** Risk Management, Schedule Tracking, Integrity Check
- Project Management:** Agile, Waterfall, planning deliverables

Achievement Dashboard

Education & Certifications

Education

- Hongik University, Electronic Engineering** (Mar 2013 ~ Feb 2020)
 - GPA: 3.11 / 4.5
 - Thesis: LD Equivalent Circuit Design and PLL Design
 - Major Courses: Circuit Design, Radio Engineerings, Computer Engineering

Certifications

- OPIC** (Mar 2019) - ACTFL (American Council on the Teaching of Foreign Languages)
